

HITARTH CHOUBISA

hitarthc64@gmail.com ◇ hitarth64.github.io ◇ 79 Huron St, Toronto

EDUCATION

University of Toronto	2018 - 2020
Master of Applied Science , Electrical & Computer Engineering	GPA: 4.0/4.0
Indian Institute of Technology Bombay	2013 - 2017
Bachelor of Technology with Honors in Electrical Engineering	Overall GPA: 9.43/10.00
MINOR in Computer Science	

WORK EXPERIENCE

Electrical & Computer Engineering, University of Toronto	2018 - Present
<i>Research Assistant</i>	
· Developing machine learning algorithms for solving problems in quantum physics under advisory of Prof Ted Sargent	
Sony Energy Devices, Japan (Now part of Murata Mfg. Co. Ltd.)	2017 - 2018
<i>Development Engineer</i>	
· Worked on development and deployment of new algorithms for modular communication	
· Developed machine learning inspired model for State of Charge Estimation of Li-ion batteries	

TECHNICAL STRENGTHS

Computer Languages	Python, C++, MATLAB, Verilog, Shell scripting, Prolog, SQL, ROS
Packages & Tools	Machine Learning, Signal Processing, Excel, Tensorflow, Pytorch

RELEVANT COURSES

Field	Description
Machine Learning & Maths	Statistical Learning, Statistical Methods for Machine Learning & Data Mining , Research Topics in Machine Learning, Linear Algebra, Probability & Random Processes
Others	Advanced Image Processing, Speech Processing, Adaptive Signal Processing, Digital Signal Processing, Design & Analysis of Algorithms, Algorithms & Data Structures

RELEVANT PROJECTS

NLP driven synthesis of new compounds	Guide: Prof E Sargent
· Using NLP to learn from existing literature and predicting best suited conditions for previously unknown compounds.	
Investigating generalization in Deep Neural Networks	Guide: Prof M Erdogdu
· Bayesian Evidence to make the distinction and potentially make predictions about memorization vs learning in NNs	
ML driven discovery of defect free materials	Guide: Prof E Sargent, Prof I Tamblyn
· Using Graph Convolution Networks, developing methodology to discover defect resistant photovoltaic materials	
Video Reconstruction based on Compressive Coded Apertures	Guide: Prof. A.Rajwade
· Used Compressed Sensing(CS) for reconstructing slowly changing videos & compared different algorithms for the same.	
Natural Language Processing for launching successful campaign	Dessa AI Competition
· Using NLP techniques on Kickstarter data to design a successful campaign, won the DESSA AI Consulting competition, 2019
